

CLAIM AMENDMENTS

1-15. (Canceled)

16. (Currently amended) A wood-based decorative article comprising:
a veneer formed by slicing wood and ~~having a transparent property being~~
light permeable; and
a substrate formed of a transparent synthetic resin and joined to a rear
surface of said veneer, said substrate having rigidity and a larger thickness than
that of said veneer.
17. (Original) A wood-based decorative article according to claim 16,
wherein a transparent reinforcing member for reinforcing said veneer is
interposed between said veneer and said substrate.
18. (Original) A wood-based decorative article according to claim 17,
wherein at least one of said veneer and said reinforcing member is impregnated
with a transparent synthetic resin.
19. (Original) A wood-based decorative article according to claim 16,
wherein a design layer for increasing variation of a design of said veneer is
arranged on at least one of front and rear surfaces of said substrate.

20. (Original) A wood-based decorative article according to claim 19, wherein said design layer is removably attached to said rear surface of said substrate.

21. (Original) A wood-based decorative article according to claim 16, wherein a light source for illumination is provided on a rear surface side of said substrate.

22. (Original) A wood-based decorative article according to claim 21, wherein at least one of a color and an amount of light emitted from said light source is variable.

23. (Original) A wood-based decorative article according to claim 21, wherein a light guide plate for making uniform said light from said light source is interposed between said light source and said substrate.

24. (Original) A wood-based decorative article according to claim 21, wherein a display member for displaying predetermined information is provided on a front surface of said veneer.

25. (Original) A wood-based decorative article according to claim 16, wherein an indicator for giving a predetermined indication by using at least one of a liquid crystal device and an LED device is provided on a rear surface side of

said substrate.

26. (Original) A wood-based decorative article according to claim 16, wherein part of said substrate is formed of an opaque synthetic resin.

27. (Original) A wood-based decorative article according to claim 16, wherein a topcoat is applied to a front surface of said veneer.

28. (New) A wood-based decorative article comprising:
a veneer formed by slicing wood and being light permeable;
a substrate formed of a transparent synthetic resin and joined to a rear surface of said veneer, said substrate having rigidity and a larger thickness than that of said veneer; and
a transparent reinforcing member interposed between said veneer and said substrate for reinforcing said veneer.
